

STABI OXY +

Pipe with new type of polypropylene intended for hot water and for heating up to 90°C with 100% oxygen barrier. It is a perfect pipe for replacement the standpipe.

Advantages of innovated pipe STABI OXY +

- higher pressure resistance at high temperatures with using new material PP-R 4 (PP-RCT)
- bigger flow profile
- high strength and stability comparable with metal pipes
- 3x lower length expansion than PPR pipes
- service life minimum 50 years
